	<p>Sonumaxx 2.4 PR Headset & Neckloop system £114.99 exc VAT</p> <p>Sonumaxx 2.4 PR Neckloop only system £109.99 exc VAT</p> <p>With adjustable volume up to 120 dB, the Sonumaxx listener has exceptionally clear audio reproduction and high-quality sound - reliable and free of background noise. Unlike many TV listeners this can also be used as a personal conversation amplifier, independent of the charging base unit.</p> <p>The system has two batteries, one charges while the other is being used. There is also a button on the front of the transmitter that allows you to select one of three sound profile presets, so the user can choose which one suits them best.</p> <p>The System has digital (Optical/Toslink) connections, and also analogue audio connection or you can use the supplied Microphone to pick up the sound.</p>
	<p>Geemarc CL7060 TV Listener with Neckloop £85.99 exc VAT</p> <p>The CL7060 lets you set the volume that's right for you, without disturbing anyone else. You can also listen to other audio devices, including a radio or MP3 player. The wireless neckloop is hearing aid-compatible and works with hearing aids and cochlear implants with a hearing loop setting. Plus, it has a built-in microphone for amplifying close range conversation.</p> <p>Can also be used as a conversation amplifier.</p>
 <p><u>New & Improved</u> Now with built in digital converter to suit modern TVs and an improved neckloop design</p>	<p>Echolink £80.49 exc VAT (Action on Hearing Loss)</p> <p>Radiolink £125.00 exc VAT (Hearing Products International)</p> <p>The Echolink and Radiolink TV listeners can easily connect to the TV and will transmit directly to your hearing aids through the neckloop provided. The in-built battery can last up to 30 hours without charging. The pack also comes with a pair of stethoset headphones and earbuds.</p> <p>The Echolink's infra-red signal has a 20m range but will only work when you are within sight of the transmitter. The Radiolink's radio signal has a range of up to 50 metres and can be picked up around the house or down the garden. Price includes postage</p>
	<p>Sarabec LA240 loop system (Action on Hearing Loss) £83.69 exc VAT</p> <p>The Sarabec LA240 Induction Loop System For TV is an excellent loop system that can pick up modern and high quality digital audio. Easily connects to modern TVs but requires a wire to be fitted around the room. It also comes with a remote control that will allow independent volume adjustment for the hearing aid wearer.</p>
